

## LC-3DMixer

Specification	Value
Related voltage	AC 100-240V, 50/60 HZ
Power consumption	10W
Fuse	250V, T2A
Dimension	W410XD270XH100mm
Weight	4Kg

The LC-3D Mixer is a roller/tilting stirring device for mixing 3D printing materials before pouring in the Resin Tray of the printer. Print resins must be mixed well. Only handshaking is insufficient for highly filled and colored materials. The LC-3D Mixer should be used to thoroughly mix the material. When mixed insufficiently color deviation and print failures may occur. The NextDent LC-3D mixer keeps your NextDent 3D materials ready for use at any time at an optimum consistency.
